# HUDSON HOUSE

PROJECT TYPE CLUBHOUSE  
SIZE 7,030 SF

Hudson House at Bedford is located in Corona and named after Nathaniel C. Hudson, a local and influential historical figure. By implementing elements of the American Barn style, this community center was designed to include one larger structure surrounded by a series of smaller, satellite buildings which all encompass a central outdoor area. This collection of indoor and outdoor gathering spaces became an integral part of the design, a faithful representation of a community center that encourages residents to host, attend, teach and ultimately come together in a space as unique as they are.
