

MIGHTY BUILDINGS - TOWNHOMES

PROJECT TYPE	PANELIZED TOWNHOMES
SIZE	1,969 SF - 2,126 SF 3-4 BED, 2.5 BATHS
SPECIAL FEATURES	3D PRINTED EXTERIOR PANEL SYSTEM PANELIZED INTERIOR WALL PREFAB ROOF STRUCTURE MODULAR CASEWORK PREFAB BATHROOM PODS

This set of townhomes uses proprietary 3D printing technology in a panelized format to create these uniquely styled homes. The construction of these homes entails fewer site located trades, faster site construction, and reduced site waste. Any 3D printed material refined during production can be reground and reused for a 99% reduction in waste at the factory. Additionally, any building segment not 3D printed is either panelized or modular creating further efficiencies in site construction.
